Application: Surface machining, narrow contours, and surfaces

Double Cut

The most popular burr for ferrous applications.

The flutes are ground in both the left and right hand direc-

tions, offering better operator control and rapid stock removal in harder materials.

The double cut geometry reduces the size of the chips and can be used at slower than normal speeds.

Aluma Cut

Designed for used on aluminum, non-ferrous metals, soft steel, reinforced plastics and other soft materials.

The burrs are designed with a high flute finish for easy chip flow and fast stock removal and excellent work piece finish.
