Amana Tool 45° Miter Joint Under-Cut Assembly 4-Wing with "Ultra-Glide™" Ball Bearing Assembly

Thank you for shopping with us! Eliminate that dark line at the edge of a counter or other laminate-covered surface. With this bit assembly, the laminate cemented to the substrate can be trimmed and mitered in one pass. Then a pre-mitered edging strip can be applied. The resulting seam is clean and crisp. Not intended for use in a laminate trimmer.

A - Laminated top is "undercut"

B - Apron laminate is pre-cut at 45°

C - Adhere pre-cut laminate for a perfect fit. A fine file may be used to remove the sharp edge after joining

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Replacement Parts	Bearing(s)	Note	Overall Length	Shank	Wings	Angle	Price
--------	--------------	----------	------------------------------	-------------------	------------	------	----------------	-------	-------	-------	-------
