Amana Tool 7° Angle Dovetail Carbide-Tipped Bits

Thank you for shopping with us! MAKE CLEAN & BEAUTIFUL DOVETAIL JOINTS! The dovetail joint is the strongest construction method for drawers, boxes, chests, and fine casework. Amana Tool® designs the bits needed by many router dovetail jigs that require cutting half-blind and through dovetails. We carry the bits for name-brand dovetail jigs, including Leigh®, Keller™, Omnijig®, and Incra®. For the Keller™ Dovetail Templates and certain Incra® applications, 7° dovetail bits are required. (Bits for the Keller™ system are supplied with shank-mounted bearings.) This angle is also used in cutting stair stringers.
