Amana Tool 4-Piece Flush Trim with Ball Bearing Collection

Thank you for shopping with us! Use this flush trimming bit for laminate work or for template and pattern work. For template application, the bearing follows the template while the cutting edges trim the workpiece. With the router handheld, the template is on the bottom of the work. With a table-mounted router, the template is on top. A two-flute bit is a good general-purpose choice, providing fast cuts and good finishes. Excellent for template work. AMAX Extended Life Features: 200% longer life-time even when working with abrasive materials Superior geometric design Advanced grinding technology that improves the carbide's resistance to wear Super clean cuts
