Amana Tool Dynabit™ Laminate Trim Carbide-Tipped 2-Flute w/Ball Bearing Guide

Thank you for shopping with us! The Amana Tool Dynabit™ Line features a modest downshear for an excellent finish. The helix bits have a spiral-like twist to the cutting edges, making them especially good on difficult materials such as melamine. An adhesive-trapping gap between cutting edges and pilot bearing is featured on tools #47111 & #47113. **NOTE**: Downshear bits are not intended for router table use. AMAX Extended Life Features: 200% longer life-time even when working with abrasive materials Superior geometric design Advanced

grinding technology that improves the carbide's resistance to wear Super clean cuts Sample:

Item # Manufacturer Bearing(s)	Cut Height, Length, or Width		lute Overall Length	Shank Note	Price
