Amana Tool Vertical Raised Panel Carbide-Tipped 2-Flute

Thank you for shopping with us! Raised panels with a low horsepower, fixed speed router using these patented VERTICAL raised panel bits. You must do the work on a router table, with the work on edge, braced against the fence. Arched or curved shapes (i.e. "cathedral" door panels) cannot be routed. To prolong tool life and achieve the best cut finish, several passes are recommended.
