Amana Tool CNC AlTiN Coated Double Edge Folding V Groove for Shaping Composite Materials, Solid Carbide

Thank you for shopping with us! The Aluminum Titanium Nitride (AlTiN) coated, solid carbide cutting tip is brazed to a steel shank specially designed to cut grooves in composite building materials. These bits are widely used as cladding for many diverse applications such as office buildings, hospitals, convention centers, airports, hotels. Routing V-shaped grooves, whereby the aluminum cover and a part of the polyethylene core is removed, allows folding/creasing the remaining material by hand. Designed for cutting and scoring aluminum sandwich materials including:

- Aluminum, Clay, Zinc & Wood Composite Panels
- Aluminum Composite Materials (ACM)
- Aluminum Composite Panel (ACP)*
- ALPOLIC® Copper Composite Material (CCM)
- Alucobond®
- Alupanel®
- Dibond®
- Durabond**
- e-panel™
- Etalbond®
- Phenolics
- Plastic/Acrylic
- Plexiglas®
- Stainless Steel Composite Material (SCM)
- Titanium Composite Material (TCM)
- Wood

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Overall Length	Shank	Angle	Price
