Amana Tool FiberGlass & Composite Medium Burr with 135° Drill Point

Thank you for shopping with us! Amana Tool's FiberGlass Router (FGR) burrs incorporate reciprocating diamond-fluted geometry, strong negative rake angles, and generous fluting to provide the best cutting action in a wide variety of woven resin bond fiberglass and composite materials. Combining the proven performance of a diamond-cut geometry with the capacity to plunge, while leaving a minimum of top-side burr. 135° drillpoint minimizes part deflection on thin or otherwise unsupported workpieces. **Excellent for Cutting:** -Glass Reinforced Plastic (GRP) -Phenolic -Composite Materials -Fiberglass -Carbon Fiber -Edging and Slotting All Carbon Fiber Reinforced Polymer - Plastic Materials (CFRP) -Composite Materials -Fiber Reinforced Plastic (FRP) -G10 / FR-4 and G11 / FR-5 Glass Epoxy Composite Laminate Material -Micarta® (Brand name for composites of linen, canvas, paper, fiberglass, carbon fiber or other fabric in a thermosetting plastic.) -Thermoset Composites -Thermosetting Plastics -Fiberglass PCB Board **AlTiN coating has many benefits:** •Extra wear resistance •Allows for faster feed and speed rates •Cutting edge protected from wear •Better chip evacuation •Less heat buildup •Superior cutting quality and extended tool life 

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Overall Length	Shank	Price
46098	Amana Tool	1/4 in	3/4 in	2 in	1/4 in	\$38.63
