Freud Finger Joint Bit

Thank you for shopping with us!

Application: Joining wood edge-to-edge or end-to-end -Produces a joint that is stronger than the wood itself. -Tips on each side of the bit that are offset, cutting twice as many 'fingers' as you see tips on each side of the bit. -Cuts all composition materials, plywoods, hardwoods, and softwoods. -Use on CNC and other automatic routers as well as table-mounted portable routers.
