Mastercut Tool 1 Flute 0 Flute Downcut Spiral (Soft Plastics)

Thank you for shopping with us!

Material Finish-Top: Excellent Material Finish-Bottom: Poor Crescent Points are good for both plunging and flat bottom cutting. 1 Flute routers are a good choice for soft materials. They provide a good finish, and are capable of faster feed rates. Downcut routers produce the best finish to the top of the material. Chips flow in a downward direction. Spiral routers should only be used in automatic feed operations. They are good for use on all materials.
