Mastercut Tool 1 Flute O Flute Upcut Spiral (Soft Plastics)

Thank you for shopping with us!
Material Finish-Top: Poor Material Finish-Bottom: Excellent Crescent Points are good for both plunging and flat bottom cutting. 1 Flute routers are a good choice for soft materials. They provide a good finish, and are capable of faster feed rates. Upcut routers are used when a good bottom finish is desired on the material. Chips flow in an upward direction. Spiral routers should only be used in automatic feed operations. They are good for use on all materials.
