Mastercut Tool 2 Flute Upcut Spiral (High Impact)

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping

Material Finish-Top: Poor

Material Finish-Bottom: Excellent

2 flute routers work well with harder materials, providing an excellent finish to the material.

Upcut routers are used when a good bottom finish is desired on the material. Chips flow in an upward direction.

Spiral flute router bits should only be used in automatic feed operations. They're good for use on all materials.

Plunge (Fishtail Point) are the most commonly seen end points in the wood router industry. They're perfect when a rigid plunge point is required.
