Mastercut Tool 4 Flute Upcut Combination Spiral (High Speed)

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping. Material Finish-Top: Poor Material Finish-Bottom: Excellent. Spiral flute router bits should only be used in automatic feed operations. They're good for use on all materials. Upcut routers are used when a good bottom finish is desired on the material. Chips flow in an upward direction. Endmill Points are most often found on 3 and 4 flute routers. They're good for achieving a smooth finish on a flat bottom surface, and are commonly used in the plastic routing industry.
