Whiteside Machine 'Ultimate' Flush Trim Router Bits

Thank you for shopping with us! "ULTIMATE" Trim Bits are perfect when working with templates or when using a router to flush trim matching wood surfaces. Whiteside's compression spiral design, along with a ball bearing guide, make this bit easy to use in the router and produces a superior quality trimmed edge. The "ULTIMATE" Trim series brings industrial engineered bits, previously manufactured for CNC machines, right into your shop. These bits leave a crisp clean edge on both the top and bottom edge of the workpiece. Advantages of the "ULTIMATE" bit: -Dedicated cut length to match the material thickness. -Upcut flute extends into shank to improve chip evacuation. -Ultimate chip control allows the bit to cut more freely, run cooler, and last longer. -The down-shear flute cuts a 45° chamfer. Position the depth to barely shave the top edge of the material or lower the bit to cut up to a 1/16" chamfer. -3/8" cutting diameter bits are optimal for routing sheet goods. They remove less material with lower horsepower than 1/2" cutting diameter bits. -1/2" shank diameter provides the best rigidity and eliminates the need for odd-sized collets.

Item #	Manufacturer	Diameter	Cut Height, Length, or Width	Shank	Type	Overall Length	Price
UDFT9112	Whiteside Machine	7/8 in	1 1/8 in	1/2 in	Flush Trim	3 3/4 in	\$173.87
UDP9112	Whiteside Machine	7/8 in	1 1/8 in	1/2 in	Plunge/Pattern (2+2 Compression)	3 1/2 in	\$186.30
UDC9112	Whiteside Machine	7/8 in	1 1/8 in	1/2 in	Combination	3 3/4 in	\$186.30
