Whiteside Machine Plunge Cut Hand Grip

Thank you for shopping with us! These are mainly used for cutting hand holds in the center of the project or the front edge of stair treads. For CNC work, the plunge point allows for penetration into the center of the workpiece. Plunge cuts into material with use of hand router or router table is not recommended. Materials: Natural woods, composite woods Recommended RPM: 12,000-14,000 (max 18,000)
