Whiteside Machine Radius Flute Cutters

Thank you for shopping with us!

Whiteside's Radius Flute Cutter creates a small concave radius curve; use with or without a template to cut a decorative edge. Whiteside's 3185 Radius Flute cutter is commonly used with Tongue and Groove flooring in conjunction with our #3002 Template Bit. 3520, Whiteside's Canoe Making Bit, is sold individually as a 1/8" Radius Fluting Bit (#3520) or Beading Bit (#3530). When used together to edge 1/4" thick stock, the resulting joint allows each strip to be angled. This allows assembly in a curved configuration for numerous projects such as canoe hulls.
