Amana A.G.E. Series Cut-Off & Crosscut Saw Blades: ATB

Thank you for shopping with us!

Smooth crosscuts & long cutting life. These blades are designed for smooth crosscuts in a variety of materials from hardwoods, softwoods, and sheet goods including chipboard. The alternate top bevel and 0° - 15° hook angle provides a smooth surface and a long cutting life. **Festool® and other track saw machine compatible saw blades**. Carbide-tipped Festool and other track saw machine compatible saw blades are available for cutting aluminum, steel, building panels, laminates, melamine, soft plastics, solid surfaces, and wood. Specifically designed to be compatible with your Festool machines. Available in 160mm, 210mm, and 260mm diameters. **Thin Kerf Miter/Finishing Saw Blades**. Cut gap-free miters, every time. These blades are designed for smooth crosscuts in a variety of materials from hardwoods, softwoods, and sheet goods. Ideal for underpowered saws; thin kerf blades reduce waste in expensive materials and require less horsepower to operate. **Warning**: Not recommended for cutting non-ferrous alloys, plastic, laminate, and melamine.
