### Amana A.G.E. Series Solid Surface Saw Blades: M-TCG Grind

Thank you for shopping with us!

Excellent for cutting solid surface materials.

Specifically designed for cutting solid surface materials such as Avonite®, Dupont Corian®, Wilsonart®, Gibralter®, Earthstone®, Fountainhead®, Surrell®, Staron®, plastic laminate, Plexiglas®, and other acrylic based materials. The modified triple chip grind is especially configured to leave a swirl-free cut in solid surface materials. Thicker than normal steel plates reduce vibration that degrades the cut and shortens tool life. Suitable for a variety of saw configurations. The hook angle virtually eliminates self-feeding when used on radial arm saws.

### MD160-488: Festool® and other track saw machine compatible

Carbide-tipped Festool and other track saw machine compatible saw blades are available for cutting aluminum, steel, building panels, laminates, melamine, soft plastics, solid surfaces and wood. Specifically designed to be compatible with your Festool machines. Available in 160mm, 210mm and 260mm diameters.
