Amana Tool Thin Kerf Fine Finishing TC Grind

Thank you for shopping with us!

Thin kerf blades are designed for miter smooth cuts—less drag on bearings and brake and reduces stock loss on expensive woods and veneer plywoods. Not recommended to cut stock over 3/4" without the use of a stabilizer. TC grind can also be used for cutting thin Plexiglas®, masonite, and plastics.

Warning: Before use, read saw blade safety guidelines in [Amana's catalog](#).
