Everlast Thin Kerf Saws - Alternate Top Bevel

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping

Thin kerf blades create less power drain on machine and allow for minimum of stock waste.

Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance crosscutting.

Item #	Arbor	Bore	Diameter	Grind	Kerf	Manufacturer	Plate	Teeth	Price
