Everlast Thin Kerf Saws - Alternate Top Bevel

Thank you for shopping with us!

Thin kerf blades create less power drain on machine and allow for minimum of stock waste.

Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance crosscutting.
