Everlast Split Scoring Saws - Straight Top

Thank you for shopping with us! Used on sliding carriage panel saws to score the bottom of panels, thus allowing a large saw to cut through without chipping the material on the bottom side. Shims are provided to adjust kerf to match large blade. Straight Top Grind - STR - Each tooth will cut full kerf, making this design very effective for removing material however high cutting pressures are present. Typically used for rip cutting hardwood and softwood.

Item #	Diameter	Bore	Grind	Kerf	Teeth	Manufacturer	Price
SS12012-34	120 mm	19.05 mm (3/4 in)	STR	110-142 in	2 x 12	Everlast	\$151.86
SS12012-20	120 mm	20 mm	STR	110-142 in	2 x 12	Everlast	\$151.86
SS12012-22	120 mm	22 mm	STR	110-142 in	2 x 12	Everlast	\$151.86
