Freud Combination Blades: Series LU84M/LU84R

Thank you for shopping with us!

In many woodworking shops, one saw must serve multiple purposes. It must rip a piece of 4/4 oak and also crosscut a sheet of 3/4" plywood. The groups of five teeth include one flat tooth for ripping, followed by four alternate top bevel teeth for crosscutting, and a large gullet for effective chip clearance. This blade also features laser-cut anti-vibration slots, practically eliminating the vibration that resonates in standard blades. With this ultimate combination blade, there is no need for stabilizers. Premium TiCo™ HI-Density Carbide Combination Blend for Maximum Performance. Large Gullets in front of flat top rakers allow for fast ripping and easy chip removal. Laser-Cut Anti-Vibration Slots drastically reduce vibration and sideways movement in the cut, extending blade life and giving a crisp, splinter-free flawless finish. Silver Ice Coating resists corrosion and pitch buildup; Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup. Ideal For: Crosscuts (3/4" to 3-1/2") & Rips (3/8" to 1-1/2"). **Tip:** Kickbacks are one of the most dangerous hazards in woodworking. Choose a saw blade with a kickback-reducing design. This design places a chip limiter before each tooth, restricting tooth bite to the maximum safe amount for a more secure work environment.

Item #	Diameter	Arbor	Kerf	Plate	Teeth	Type	Manufacturer	Price
LU84M008	8 in	5/8 in	.126 in	.087 in	40 COMB	Silver Ice	Freud Tools	\$86.85
