Freud Thin Kerf General Purpose Blades: LU86R Series

Thank you for shopping with us

Application: For General Purpose Applications This heavy-duty thin kerf blade is good for crosscutting thick hardwoods and softwoods and thinner stock materials. The ideal working range is from 3/4" to 3 1/2" thick for crosscutting, and 1/4" to 1" for ripping. Thinner or thicker material may be cut, but some loss of surface finish may occur. Premium TiCo™ Hi-Density Carbide General Purpose Blend for Maximum Performance. Heavy-Duty Thick Kerf and Plate ensure a stable, flat blade for long cutting life. Positive Hook Angle for fast cutting and easy feed. Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch build-up. Ideal For: Heavy-Duty General Purpose Applications. Crosscuts (3/4" to 3-1/2") & Rips (1/4" to 1"). **Tip:** If you experience burning on one side of the cut, you should check and adjust the saw's alignment. Consult your saw owner's manual for alignment instructions. ❌ ❌
