Freud Thick Stock Laminate Blades: LU92M Series

Thank you for shopping with us!

Application: Long Life Production Blades for Double-Sided Laminates & Stacked Chipboard This heavy duty production blade produces an excellent finish on the top and bottom of thick laminates and melamine. The LU92M series is ideal for cutting stacked 3/4" laminates and melamine. Each tooth has a special modified triple chip grind design created by computer simulation to breeze through thick stock and single- or double-sided laminates, leaving a chip-free edge. Premium TiCo™ HI-Density Carbide Laminate Blend for Maximum Performance. Modified Triple Chip Grind (MTCG) Tooth Design for long life and chip-free cuts in thick stock man-made materials. Negative Hook Angle minimizes chipping in laminates and melamine. Silver Ice Coating resists corrosion and pitch buildup. Ideal For: Double-Sided Laminates and Stacked Chipboard—ideal for cutting stacked 3/4" laminates and melamine. ***Tip:*** *Proper blade height is essential to chip-free cuts. If you experience chipping on the bottom of the material, lower the blade slightly. If there is chipping on the top of the material, the blade height should be increased slightly.*
