Freud Thick Stock Non-Ferrous Metal Blades: LU89M Series

Thank you for shopping with us!

Application: Cuts Thick Non-Ferrous Materials & Aluminum This heavy duty, non-ferrous metal cutting blade produces an excellent finish. These blades have custom designed gullets to minimize chip buildup and specially formulated carbide for a long life. Freud recommends use of a liquid lubricant when cutting. This can be accomplished with a spray of WD-40 or other lubricant every 4 to 5 cuts. *Wax sticks are not recommended*. Premium TiCo™ HI-Density Carbide Non-Ferrous Blend for Maximum Performance. Freud-Made TiCo™ Carbide specifically designed to cut non-ferrous metals extends tooth life. Unique Gullet Design reduces chip buildup, which can cause shoulder damage or breakage. Silver Ice™ Coating resists corrosion and pitch buildup. Ideal For: Cutting Thick Non-Ferrous Materials & Aluminum. Wall thickness 1/4" Max. ***Tip****: To determine if the metal you wish to cut is non-ferrous, hold the metal next to a magnet. If it attracts the magnet, it is a ferrous metal and should not be cut with a non-ferrous blade*.
