FS Tool Industrial Quality Segmented Hogging Units: Spare Segments

Thank you for shopping with us!

FS Tool's offering of industrial saw blades represents the state of the art answers for today's woodworking cutting applications on North American and European machinery. Our product offering is the largest of its kind. Each saw blade has been developed to fulfill a specific cutting application. Each model has been developed with its own grades of materials (carbide and saw plate), its own cutting geometry (grind, hood angle, kerf), and its own operational enhancements (copper noise reducing plugs, cooling slots).

- Commitment to Development: meets the challenge of today's applications & materials
- Commitment to Quality: personal checking of saw blades at each step in our highly-automated manufacturing process
- Commitment to Value: competitive in a demanding and dynamic industrial marketplace

Design:

- Hogger body made of light alloy equipped with 4 or 6 segments and 1 saw blade; all TC-tipped, replaceable and resharpenable
- Standard chipping width 30mm; wider chipping widths in multiples of 30mm can be achieved by adding multiple elements, which must be specified when ordering

Application:

- For chip-free sizing of panel materials on double-end tenoners and trimming machines

Item #	Manufacturer	Diameter	Teeth	Replacement Parts	Price
525008	FS Tool	245 mm	8	Spare screw: W500701	\$71.28
530008	FS Tool	295 mm	7	Spare screw: W500701	\$77.96
535008	FS Tool	345 mm	8	Spare screw: W500701	\$93.00
