Tenryu Industrial Series for Non-Ferrous: Specialty Grind for Thin Stock

Thank you for shopping with us! Tenryu introduces a unique grind of non-ferrous cutting blades for very thin stock, such as picture frame moulding, radiator fins, or other thin-walled aluminum extruded materials. The [regular Industrial Series for Non-Ferrous](#) blade has the anti-noise and anti-vibration design. However, this specialty thin stock non-ferrous cutting blade series performs even quieter and with less vibration. There is almost no deformation of the material after cutting and much less high pitch noise during the cut.

Item #	Manufacturer	Application	Arbor	Diameter	Grind	Kerf	Rake	RPM	Teeth	Price
IA-25596BX1	Tenryu	For chop/miter/radial arm saw	5/8"	10 in	MTCG	0.094	-5	5870	96	\$142.76
