Tenryu Steel-Pro® Stabilizer Series

Thank you for shopping with us! Low RPM Dry Cut Saws. Circular Saws. Tenryu establishes an even higher standard of steel cutting excellence in the portable saw, steel cutting industry! This "Stabilizer" technology stabilizes the blade in the cut with much less vibration during operation. Clean cuts, longer life, and a more comfortable feeling are great benefits of the Stabilizer, making it more "user-friendly." Tenryu blades do not require blade plate stabilizers. In fact, the patent pending design technology of the Stabilizer blade eliminates any need for a blade stabilizer and produces an even more effective job. Each Blade Features: - Stabilizer plate (patent pending) improves the cutting performance -Better straightness of cut -Cleaner cuts -Longer cutting life -Reduced burring -Reduced scattering of steel debris -Less vibration Note: Please note all safety instructions before use and adhere to instructions for maximum RPM speeds. Always wear eye protection that meets ANSI Z87.1 requirements and properly functioning upper and lower guards.
