### Amana Tool Economy Flush Trim Insert Carbide 2-Flute with Ball Bearing Guide

Thank you for shopping with us! Get the practicality and productivity of an insert bit for the cost of a standard brazed-tip bit. The small two-sided carbide insert knives usually can be changed without altering the bit setup in the router. Because the knives aren't heated for brazing, it can be made of a harder grade of carbide and it will hold its edge longer. Ideal for both standard routers and laminate trimmers. Replacement Parts: Bearing #47706; Knife Hex Key #5011 Knife Screws #67016; Bearing Screw #67018 Allen Key for Bearing #5007
