Item #109567, Vortex Tool 77mm Length - Carbide-Tipped 3/8" x 77mm Brad Point Drill

\$26.35

Thank you for shopping with us!

Brad point dowel drills are used for drilling blind holes in solid wood, wood composites, or plastic laminated materials. Brad point drills will provide a clean entrance cut, but may cause some blow-out on the backside of the material on thru cuts. These bits have a 10mm shank and are designed to run in your drill blank, but can also be used in your CNC spindle.

SPECIFICATIONS	
Diameter	3/8 in
Length	77 mm
Rotation	Right
Manufacturer	Vortex Tool
