Item #145334, Lamello 66mm x 27mm x 9.7mm Clamex P-14 Connector, 80 Pair

\$175.00

Thank you for shopping with us! The Clamex P-14 is a detachable furniture connector and anchors in a matter of seconds to the workpiece with the positively-locking P-System groove. Thanks to the minimalist 6mm opening, the Clamex P-14 is powerfully tightened and released using a lever similar to a cam connector. The Clamex P-14 stands for perfect aesthetics due to the small access hole, which is just 6mm in diameter and enables almost completely concealed joints. Designed for butt joints and mitre joints, the Clamex P-14 is also characterized by an extremely time-saving manufacturing process. The P-System groove is manufactured precisely either with the Zeta P2 biscuit joiner or with a CNC machining center. The connectors can then be effortlessly inserted into the grooves, and the workpieces seamlessly assembled and firmly joined with a slight actuation of the lever. Waiting times are therefore completely eliminated and an assembled workpiece can be further processed straight away or prepared for shipping. Same as with the proven Lamello system, the Clamex P-14 can be used for wood joining at almost any angle and mitres. Unlike with a cam, obtuse, acute, or flat angles can also be assembled and firmly joined. For this reason, the connector is often also used as a gluing aid for difficult-to-clamp workpieces. Applications: Detachable connecting fitting for panel materials in furniture construction Gluing aid for mitres or difficult-to-clamp angles In kitchen manufacturing for tall cupboards, carcass manufacturing, or open shelf units For interior fitting for built-in cupboards, wardrobes under stairs or sloping roofs In furniture construction for high-quality furniture with mitre connections or special angles, wine racks, or bookshelves Powerful alternative to standard connecting fittings Rapid prototype construction before starting a new furniture range Butt joints from a material thickness of 15mm Mitre connections from a material thickness of 18mm

SPECIFICATIONS	
Manufacturer	Lamello Tools
Part Desc	Clamex P-14 Connector
Length	64mm
Width	9.7mm
Height	27mm
Thickness	--
Diameter	--
Size	--
No. of Pieces	--
