Thank you for shopping with us!

This blade is ideal for cutting materials with fragile surface layers, such as veneers and laminates. High tooth count yields smooth finishes. The 10° hook angle provides effortless feeding. The triple-chip tooth opens a narrow kerf, and the raker widens it.

Note: P.H. denotes pin-hole configuration, if applicable. Example: 2/10/60 = 2 @ 10mm dia on 60mm circle.

**Warning:** Before use, read saw blade safety guidelines in [Amana's catalog](#).
