Super Premium Ultra Bor  
Type 240-UB Jobber  
Length Drills NAS 907B:  
Fractional  
\$35.34**

Thank you for shopping with us!  
Ultra Bor Super Premium - 135° split point for fast penetration and accurate starting without a center punch. Precision ground point, flutes, body, clearance, and drill diameter for the ultimate in accuracy and performance. Body and clearance are gold surface treated for maximum lubricity; temperature stress relief improves lubricity and toughness.

Manufactured to NAS 907B specification from Premium Hi-Molybdenum Steel.

Drills are heat-treated at 2185°F and then nitro-carburize finished at 950°F to be measurably harder than high-speed steel. Space age nitro-carburized steel withstands substantially higher drilling temperatures while maintaining sharpness. Recommended for use in work hardening grades of stainless steel and other hard metal drilling applications. Sizes smaller than #52 have non-split points.

Ultra Bor will substantially outperform cobalt drills in work hardening stainless steel and other tough drilling applications.

### SPECIFICATIONS

|                 |                       |
|-----------------|-----------------------|
| <b>Diameter</b> | 23/32 in              |
| <b>Flute</b>    | 5 5/8 in flute length |
