Item #2325, Whiteside Machine 15 deg, 1-1/8LD, 1/2" Shank Edge Bevel Router Bit - 12-Sided Boxes \$33.32

Thank you for shopping with us!

Similar to Chamfer bits, Edge Bevel bits provide a very small angle when used on your workpiece. This bit can also be used to make twelve-sided boxes by using it to trim both ends of the side boards. **TOOL SPECS:** Carbide-tipped edge bevel bit with 15° angle, 1" cutting length, 15/16" cutting height, 1/2" shank, and 1-1/8" large diameter for use with 1/2" collets. **EDGE BEVEL:** Edge bevel bits create a smaller, more delicate bevel compared to chamfer bits, offering precise, smooth edges for a refined finish on woodworking projects. **APPLICATIONS:** Used for 12-sided box construction or perfect for creating fine, detailed bevels on boxes, picture frames, and table edges. **BEARING GUIDE:** A bearing guide is located on the end of the bit, ensuring precise cuts and optimal performance for your projects. **CARBIDE-TIPPED:** Offers an excellent balance of quality and cost, making it ideal for a wide range of applications. **STEEL SHANK:** The steel body creates a rigid tool with reduced vibration while the carbide cutting edges provide extended life.

SPECIFICATIONS	
Manufacturer	Whiteside Machine
Bearing(s)	B3, Whiteside Machine 1/2 x 3/16 Ball Bearing - Standard
Cut Height, Length, or Width	1 1/2 in
Large Diameter	1-1/8 in
Note	Used for twelve-sided boxes
Shank	1/2 in
Angle	15 deg
Material	Natural woods, composites, hard plastics
RPM	14,000-16,000
