Item #41640, Techniks PowerCOAT 63mm ER40 Dust Seal Nut - Torque 130 ft/lbs

\$93.00

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping. **EOASAW 20% off SALE on Techniks PowerCOAT Nuts!** Use with our dust seal that snaps into the nut to seal and protect your collets and cutting tools. Match the ER collet size and shank size to the dust seal specifications. -40% more holding power than bearing nuts. -Balanced to 25,000 RPM. -Better rigidity and T.I.R. (runout). PowerCOAT Nuts outperform bearing nuts!

✘ -Rubber bearing seals on bearing nuts eventually fail, and then dust contaminates bearings to make them freeze up. -Uncoated threads limit holding power. -Bearing nuts cannot be balanced because they have moving parts so cutting tools wear prematurely.
✘ CNC Routers run better with PowerCOAT! PowerCOAT nuts greatly reduce friction between the nut, collet shoulder, and tool holder threads to increase down-force on the collet, collapsing tighter around the tool shank. This improves holding power and runout (T.I.R.). Better T.I.R. means cutting is faster and smoother, and tool life is also improved. ✘
