Item #45611-K, Amana Tool Spektra™ Solid Carbide Engraving-Signmaking 15° Angle 0.93" CH 1/4" Shank Bit for Extra-Fine Carving & Lettering Detail

$53.89

Thank you for shopping with us!

For extra-fine carving and lettering details. These tools are used for wood, plastic and solid surface materials. Maximum RPM 28,000.

Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo® provides additional improvements in four critical aspects of router tooling:

-nACo® coating is a micro-thin ceramic coating that enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality.
-Coating prevents high heat and oxidation, which is detrimental to cutting tool performance.
-Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective.
-nACo® offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits.

Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off.

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	N/A
Carbide H, or Cut H/L/W	0.93 in
Flute	1
Overall Length	2 1/4 in
Shank	1/4 in
Point/Tip	0.005 in
Angle	15 deg
