Item #45623-K, Amana Tool Spektra™ Solid Carbide Engraving-Signmaking 45° Angle 0.242" CH 1/4" Shank Bit for Extra-Fine Carving & Lettering Detail **\$32.29**

Thank you for shopping with us!

For extra-fine carving and lettering details. These tools are used for wood, plastic and solid surface materials. Maximum RPM 28,000.

Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring, nACo® provides additional improvements in four critical aspects of router tooling:

- nACo® coating is a micro-thin ceramic coating that enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality.
- Coating prevents high heat and oxidation, which is detrimental to cutting tool performance.
- Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective.
- nACo® offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits.

Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off.

| SPECIFICATIONS | |
|------------------------------|------------|
| Manufacturer | Amana Tool |
| Diameter | N/A |
| Cut Height, Length, or Width | 0.242 in |
| Flute | 1 |
| Overall Length | 2 in |
| Shank | 1/4 in |
| Tip/Point | -- |
| Angle | 45 deg |
