Amana Tool 14° Dovetail Carbide-Tipped 3/4" D x 3/4" CH x 1/2" Shk 2-Flute w/Upper Ball Bearings

MAKE CLEAN & BEAUTIFUL DOVETAIL JOINTS!

The dovetail joint is the strongest construction method for drawers, boxes, chests, and fine casework. Amana Tool® designs the bits needed by many router dovetail jigs that require cutting half-blind and through dovetails. We carry the bits for name-brand dovetail jigs, including Leigh®, Keller™, Omnijig®, and Incra®.

This dovetail bit has a shank-mounted ball bearing guide for routing dovetail slots following a template and pattern routing. The template must be mounted between the workpiece and the router. With a handheld router, the template must be on top of the workpiece. With a table-mounted router, the template must be underneath the workpiece. #45892 - for pattern cutting or jigs.
