Item #46706-K, Amana Tool CNC Solid Carbide Spektra™ Extreme Tool Life Coated Compression Spiral 1/2 Dia x 1-1/4 x 1/2 Inch Shank for Baltic Birch Plywood

\$120.43

Thank you for shopping with us. Special unique carbide for longer lifetime in abrasive material. Designed for CNC applications requiring high feed rates and a clean finish. Designed for baltic birch plywood material. Long cherished for cabinet-making and more. Flawless compression cuts. Our Spektra™ bits feature a nACo® nanocomposite coating with an extreme nanohardness and heat resistance. With a brilliant distinctively-tinted coloring nACo provides additional improvements in four critical aspects of router tooling. -nACo coating is a micro-thin ceramic coating which enables the tool's cutting edge to retain crucial sharpness and lubricity. This provides longevity and produces cutting results of the highest quality. -Coating prevents high heat and oxidation which is detrimental to cutting tool performance. -Multi-colored hues, while attractive, will dissipate upon use and yet coating will remain fully effective. -nACo offers approximately 4,500 Vickers for impressive solid hardness on cutting areas of the tool, for an increase up to 2.5 times compared to uncoated bits. Note: Blue based color dissipates immediately upon use. nACo® nanocomposite coating will not wear off. **Excellent for cutting:** Baltic Birch Plywood

SPECIFICATIONS

Manufacturer	Amana Tool
Diameter	1/2 in
B1	11mm
Cut Height, Length, or Width	1 1/4 in
Flute	2
Overall Length	3 in
Shank	1/2 in
Type	nACo Ceramic Coating
