Item #47722, Amana Tool Metric 10mm ID x 26mm OD x 8mm Thick Steel Ball Bearing Guide \$9.78

Thank you for shopping with us! Amana Tool® uses only the finest industrial quality precision ball bearings available. Bearings are double steel-shielded for extra rigidity and to inhibit dust. A special high-performance, high-temperature grease is used for maximum life. **Note:** Solvents should not be used to clean ball bearings as this will deteriorate the special grease. 'Frozen' bearings (ones that do not rotate freely) should be replaced immediately.

Fractional size specs shown in parentheses are approximate, provided for reference purposes only. Tool numbers shown in parentheses exhibit optional (not standard) bearings for these tools.
