Item #49523, Amana Tool Corner Rounding Carbide-Tipped 2-Flute w/Ball Bearing Guide **\$119.10**

Thank you for shopping with us!

A basic edge-forming bit, the corner-rounding bit rounds an edge to a given radius. The tool is shouldered to cut a fillet. The cut can be used to ease edges, as a simple profile, or as part of a complex one. Also known as a roundover, rounding over, and quarter-round. If a smaller pilot bearing is used, a second shoulder can be produced, in effect making the bit a beading bit.

Warning: Maximum RPM = 16,000. Use in a table-mounted router—not for use in a handheld router!

Not guaranteed due to extreme diameter and radius. For best results, it is recommended to use a small radius bit or chamfer the material prior to using these large radius tools. Tool life will be prolonged and a smoother finish will result.

SPECIFICATIONS	
Manufacturer	Amana Tool
Diameter	2 3/4 in
Cut Height, Length, or Width	1 3/8 in
Diameter (D1)	0.5 in
Bearing(s)	47706
Flute	2 w/Bearing
Knives	--
Note	Use in a table-mounted router; not for use in a handheld router! Not guaranteed due to extreme diameter & radius. Recommend using smaller radius bit or chamfer the material prior to using these large radius tools.
Overall Length	3 1/4 in
Radius	1 1/8 in
Shank	1/2 in
RPM	Warning: Maximum RPM = 16,000
