## Item #510801-30, Amana Tool Carbide-Tipped Aluminum & Non-Ferrous Metals10 Inch Dia x 80T TCG, -6 Deg, 30mm **Bore - For Thin Material** \$129.34 Thank you for shopping with us!

For Thin Material (under 0.25")

Ideal for cutting aluminum and non-ferrous metal bars such as copper, brass, bronze, and lead. It is also good for cutting extrusions and profiles. The negative hook angle  $(-6^{\circ})$ , triple-chip grind, and thick plate combine to produce a superior finish. The blade can also be used to cut other " difficult" materials such as plastic, PVC tubing, fiberglass, and ACM such as Alucobond®, Dibond®, and Durabond. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals.

Note: P.H. denotes pin-hole configuration, if applicable. Example:  $\frac{2}{10}/60 = 2$ @ 10mm dia on 60mm circle.

Warning: Never attempt to cut ferrous metals (steel, iron, etc.) with these saw blades!

SPECIFICATIONS	
Manufacturer	Amana Tool
Bore	30 mm
Diameter	10 in (250 mm)
Grind	TCG

SPECIFICATIONS	
Hook Angle	6 deg negative hook
Kerf	0.126
Pinholes	2/7/42 & 2/10/60
Plate	.102 in
Teeth	80
Material	For Thin Material (under 0.25 in)
