Item #510801C, Amana Tool Electro-Blu™ Carbide-Tipped Aluminum and Non-Ferrous Metals 10 Inch Dia x 80T TCG, -6 Deg, 5/8 Bore, Non-Stick Coated - For Thin Material \$122.83

Thank you for shopping with us!
For Thin Material (under 0.25")

Ideal for cutting aluminum and non-ferrous metal bars such as copper, brass, bronze, and lead. It is also good for cutting extrusions and profiles. The negative hook angle (-6°), triple-chip grind, and thick plate combine to produce a superior finish. The blade can also be used to cut other "difficult" materials such as plastic, PVC tubing, fiberglass, and ACM such as Alucobond®, Dibond®, and Durabond. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals.

Warning: Never attempt to cut ferrous metals (steel, iron, etc.) with these saw blades!

Benefits of Electro-Blu™ Coating

Reduces resin accumulation and heat build-up
Tips stay sharper longer resulting in extended blade life
Applied by using an electrostatic bonding process

SPECIFICATIONS

Manufacturer	Amana Tool
Bore	5/8 in

SPECIFICATIONS	
Diameter	10 in (250 mm)
Grind	TCG
Hook Angle	6 deg negative hook
Kerf	0.126
Pinholes	---
Plate	.102 in
Teeth	80
Material	For Thin Material (under 0.25 in)
