### Item #512961-30, Amana Tool Carbide-Tipped Aluminum & Non-Ferrous Metals 12 Inch Dia x 96T TCG, -6 Deg, 30mm Bore - For Thin Material **\$131.01**

Thank you for shopping with us!  
For Thin Material (under 0.25" )

Ideal for cutting aluminum and non-ferrous metal bars such as copper, brass, bronze, and lead. It is also good for cutting extrusions and profiles. The negative hook angle ( $-6^\circ$ ), triple-chip grind, and thick plate combine to produce a superior finish. The blade can also be used to cut other "difficult" materials such as plastic, PVC tubing, fiberglass, and ACM such as Alucobond®, Dibond®, and Durabond. Use a coolant or blade wax and clamp down the workpiece when cutting non-ferrous metals.

**Warning:** Never attempt to cut ferrous metals (steel, iron, etc.) with these saw blades!

*Note: P.H. denotes pin-hole configuration, if applicable. Example: 2/10/60 = 2 @ 10mm dia on 60mm circle.*
