Produce super-clean smooth cuts, especially in acrylic materials (Plexiglas®, Lucite®), other plastics, and wood. Bits are made according to strict tolerances from an exclusive carbide grade and polished to a mirror finish using Amana’s unique process. Ideal for industrial applications and CNC machines.

Excellent for cutting: plastic/acrylic, acrylonitrile butadiene styrene (ABS), alupanel®, acetal & nylon, corrugated polypropylene, delrin, gator board, foam board, high density polyethylene (HDPE), Lucite®, mechanical/engineered plastics, Plexiglas®, polycarbonates, solid surface, ultra high molecular weight polyethylene (UHMW), and wood.

Benefits of Mirror-Finish: Razor sharp cutting edge. Effortless chip removal. Helps prevent chip re-welding. Extends tool life. Exceptional cut quality. Dissipates heat well and prevents melting.
