Item #51563, Amana Tool Carbide-Tipped Bullnose 9/16" Radius x 1/2" Shank **\$76.28**

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping. Shape the full edge of a workpiece with a bullnose radius bit. Ideal for shaping stair treads, window sills, table and counter edges, shelves, and making moldings. The "nose diameter" ("M") is the thickness of the stock that can be nosed, i.e., given a full 180° roundover. Flats at top and bottom of the cutting edges create fillets with an edge guide on handheld routers or the fence on a router table.
