Item #51627, Amana Tool ZrN Coated Chamfer Edge, Aluminum Cutting CNC End Mill 3/16" Dia x 1/4" Shank Solid Carbide Router Bit **\$53.66**

Edge of Arlington offers free shipping in the United States when you choose flat rate shipping

Designed to route a finished appearance into aluminum, brass, copper & non-ferrous metals in one pass, Amana Tool ZrN Coated Chamfer Edge, Aluminum Cutting CNC End Mill 3/16" Dia x 1/4" Shank Solid Carbide Router Bit utilize the 'O' flute up-cut design for a super-clean finish. By combining the upcut design along with the common 3/32" convex radius, you can maximize your efficiency by routing one single pass.

Excellent for cutting:

- Aluminum
- Aluminum 5052
- Brass
- Copper
- Gold
- Non-Ferrous Metal
- Silver
- Acrylonitrile-Butadiene-Styrene (ABS)
- Fomex® with Aluminum Face
- Lexan™

The Zirconium Nitride (ZrN) coating creates a harder and tougher cutting ceramic over carbide edge, allowing for a prolonged cutting edge life, and helps to prevent the build-up/galling of material in the flutes while cutting.

Amana's combination end mill/router bits offer the flexibility to cut the radius along with the proven performance of the up-cut design for superior chip ejection.

SPECIFICATIONS	
Cut Height, Length, or Width	1/8 in
Flute Geometry	Upcut
Flute	1
Manufacturer	Amana Tool
Overall Length	
Radius	
Shank
