Item #5280, Vortex Tool 3/4"x 2 1/2" 3 Fl Low Helix Roughers Upcut \$271.78

Thank you for shopping with us! Roughing tools are designed for high feed rates on CNC routers and are used when surface finish is not important in dense materials such as hardwoods, particle board, and plywood. The low helix design of these tools is a less aggressive version of Series 1000/1100 and Series 1600/1700. They will produce less "lifting" and "fluttering" of the material. These tools will produce a rippled edge cut and are extremely quiet and smooth cutting even in heavy cuts and high feed rates.

SPECIFICATIONS	
Manufacturer	Vortex Tool
Diameter	3/4 in
Cut Height, Length, or Width	2 1/2 in
Overall Length	5 & 6 in
Shank	3/4 in
Flute Geometry	Upcut
