Amana Tool Carbide-Tipped Edge Fluting Assembly 1/8" Radius x 3/4" Dia x 1/4" Shank 2-Flute with Upper & Lower Ball Bearing Guides

Cut individual flutes—shallow, small-radius grooves—in narrow edges without having to balance a router on that edge. The bit cuts at right angles to the bit axis. Flute depth is controlled by the pilot bearing—the flute's position by the router's bit-height setting. Use in a handheld or table-mounted router.

Replacement parts: bearings #47701 (upper) and #47706 (lower); collar #47724
